Roberto de Paolis:

Kunst am Bau

In seinen auf mattes Plexiglas gedruckten Fotografien, die direkt vor dem Fenster im Fensterrahmen installiert werden, thematisiert Roberto de Paolis den Kontrast zwischen privatem und öffentlichem Raum. Tagsüber sind die Fotografien durch das Sonnenlicht von innen und außen sichtbar, nachts werden sie durch das Licht im Innenraum beleuchtet.

Die Motive und die Größen sind individuell abstimmbar.

Work in progress

In his pictures – print on a mat Plexiglas and put directly in front of a window just in the centre of the window-frame – Roberto de Paolis deals with the contrast between private and open space. During the day the pictures are visible through the daylight from within and without. During the night they are illuminated from the light inside of the room.

Themes and sizes are individually harmonizing.
